

Advantages recycled polyester!

- **Redution of energy and CO₂**
 - with every kg of recycled PET, tree kg of CO₂ are saved
 - thus, 1.000 kg of recycled PET result in af saving of 3.000 kg. og CO₂
 - this corresponds to the average emission of a car per year
- **Revovery of limited fossile resources**
- **Improved life Cycle Assessment (LCA) of recycled PET (rPET) compared with virgin PET (vPET)**
